

MALHAR DIWAN

AI / ML • Data Engineering • Photography • Product Thinking

Email	malhar020902@gmail.com
Portfolio	malharportfolio.dev
Location	Pune, India

PROFILE

Engineer with a strong foundation in data engineering, AI/ML, and applied software development. I build reliable data systems, automate workflows, and create products that sit at the intersection of engineering and creativity.

EXPERIENCE

VOIS — Data / Engineering

Current role focused on enterprise data workflows, ETL automation, and deployment support across telecom data environments.

Python, ETL pipelines, Ab Initio, Teradata SQL, Unix/Linux, data validation and release coordination.

bizAmica — AI / ML / Automation

Worked on product-oriented Python applications, REST APIs, automation pipelines, and AI/ML workflows.

Flask, Django, MySQL, REST APIs, Docker, Kubernetes, Linux, prototype systems and deployment support.

SKILLS

Python · SQL · ETL · Data Engineering · Machine Learning · Deep Learning · Computer Vision · APIs · Django · Flask · Docker · Kubernetes · Linux · Git

PROJECT HIGHLIGHT

Skin-lesion classification using CNNs and Autoencoders on HAM10000, with a 90% validation accuracy achieved using a CNN-based workflow.

EDUCATION

B.Tech in Electronics & Telecommunication Engineering — Vishwakarma Institute of Information Technology, Pune

CGPA: 8.96
